Types of Elevators

HOSPITAL / STRETCHER ELEVATORS

: We make hospital Elevator that is used for vertical transportation of people, stretcher, hospitals staff, patient and hospital equipment. These multi-functional elevators are designed in accordance with industry construction, noiseless operations, jerk free movement and low maintenance. This elevator is as per the size required for transporting patient stretchers and as per the hospital standards.

CAR ELEVATORS : A car elevator is designed with heavy duty durable components to meet various load capacities above two tones. These elevators provide sufficient maneuvering space for automobiles of different sizes and shapes to drive in and out of it with ease. It can withstand the daily pressure of vertical transport of heavy loads of automobiles with ease and expertise

CONSTRUCTION ELEVATOR:

We are leading suppliers of man & material construction lift. We offer superior quality, performance and service. This construction traction lift is durable in nature. Features high product quality for smooth performance and low maintenance efficient service and prompt breakdown attend customized solutions experienced technical team. returns of investment within 12 to 18 months in high rise construction projects it uses shaft meant for passenger elevators

INCLINED LIFTS Smooth access to the wildest landscapes Designed to fit in perfect harmony with the surrounding landscape, our inclined lifts enhance mobility regardless of any natural obstacles that might stand in their way.

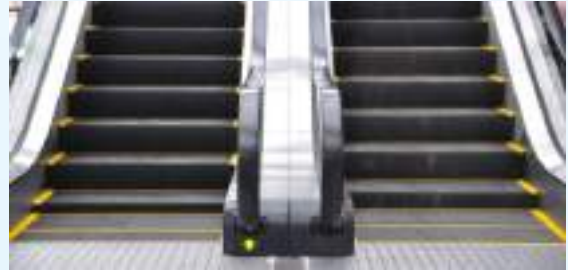

Tailor made : To meet individual requirements.

Easy to use : Starnine inclined lifts ensure safe and smooth transfer through levels.

Comfortable : The cabin can be equipped with air conditioning unit in both warm and cold climates.

Escalators

Our Escalator system provides a smooth, uninterrupted mobility solutions for large public spaces with high-traffic demands such as airports, subway, railway stations and commercial centers. Eco-efficiency, flexible design and a high focus on safety are the building blocks of our broad range of escalator solutions. We have solutions for all applications – from small commercial centers to busy transit hubs, we offer services and support for every step of your project - from building design to construction.

Car Parking System

As cities get increasingly congested, Parking spaces become increasingly precious. As cities begun going vertical, so have parking spaces, Star Nine Elevators has devised sophisticated Parking Systems for automobiles that optimize space, Require minimum maintenance and are easy to operate. These are systems that also demand a high level of customization depending upon available spaces in high density areas and proportionate load requirements.
